CS0.101: Computer Programming (Section B)

Quiz 1 (Fall 2023) Duration: 45 mins

18-0.

Question 1: (5 marks)

Write a program to find the sum of first n even numbers. Here n can be taken to be an input from the user.

011 100

010

Question 2: (5 marks)

Explain the control flow between the RAM, Hard disk and the CPU after a program is written.

Question 3: (5 marks)

Question 4: (5 marks)

010

010

Write -15 in 1's complement form (assume 8-bit representation).

011

State True/False with justification: Given two numbers x and y, the expression $y \wedge ((x \wedge y) \& - (x < y))$ calculates the minimum of the two numbers.

Question 5: (10 marks)

2 --- 3

4---5--6-6

Write a program to print the following pattern.

ch=1;

-(xzy).

$$\begin{array}{rrrrr}
 & - & - & 1 \\
 & - & 2 & - & 3 \\
 & - & 4 & - & 5 & - & 6 \\
 & 7 & - & - & 8 & - & 9 & - & -10
\end{array}$$

for (int = 1; i = 4; i+1), 3 < 2:50

for (int = = 2; i+1)

for (int = 1; j = 2; j+1)

1 print ch;

3 ch+1
3 point In

010

Instructor: Girish Varma • Course Code: CS0.101 • IIIT Hyderabad

49

Problems are in comments, highlighted.

```
